HERMITS REST

Rest House

As you walk past the arch, the rest house appears as though it is emerging from the rim—first the chimney, then the stone wall, then the porch.

Three 1922 guests pose on the trail you still follow today.

The rustic design of Hermits Rest was that of Mary Colter, a pioneering architect whose distinctive style helped shape the architecture of the Southwest and the national parks.

Your visit and rest here is part of a long tradition started in 1914 with the opening of Hermits Rest. After an 8-mile (13 km) buggy ride, you would be greeted by the resident caretaker and offered a refreshing drink to clear the dust from your throat. The smell of mules nearby may have filled the air and smoke wafted a pleasant scent from the stone fireplace. After a short walk you would return to El Tovar, or ride a mule the 7.5 miles (12 km) to Hermit Camp for a delightful meal and restful sleep.

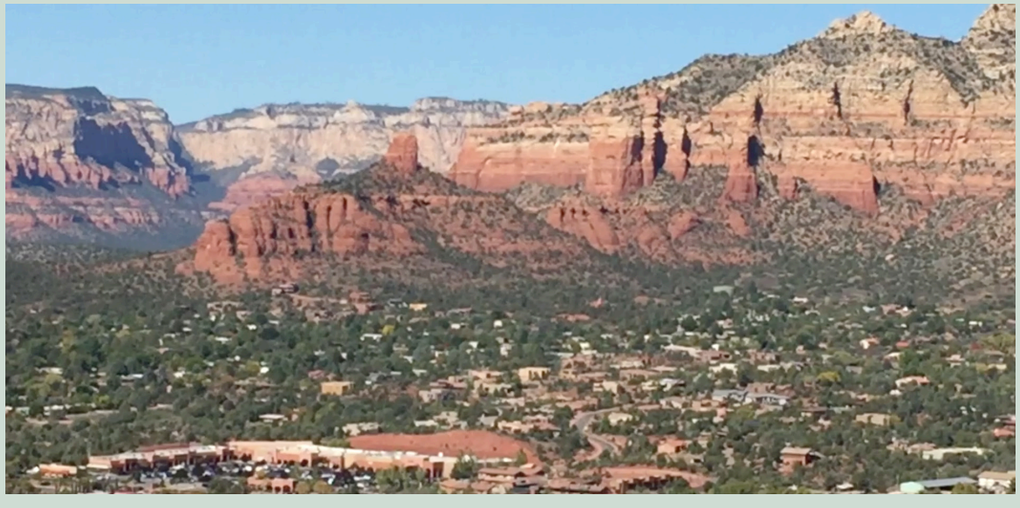

Legend tells that prospector Louis Boucher was the "hermit" for whom the Hermit area was named. In actuality, he operated his own tourist cabins and was a popular canyon guide.

WE GRILL IT
Located just outside is the old Arizona Territorial Jail whose walls once corralled such notorious outlaws as Seligman Slim, Four Fingered Frank and the legendary Carl "Curly" Bane. Standing next to the jail is a replica of some old west store fronts that have been the background for many commercials and documentaries filmed in the area.
